

# Sorter

**Sorter decreases delivery time and increases production capacity**

## Sorter

SMC customizes sorting system according to customer's needs that provides the highest performance of sorting. It is controlled by our own controller, interfaced with customer's ERP and WMS, which delivers goods by recognizing bar code or RFID. SMC's sorting system will generate a rapid return on investment due to decreased labor costs and increased work accuracy.

## Basic Specification

- ✓ Variable type applicable as per user's requirement
- ✓ Conveyor Speed: Varies upon conveyor type
- ✓ Driving Way: Automatic
- ✓ Flexible routes applicable

## Benefit

- ✓ Convenient operation and management with minimum labor
- ✓ Reliable and fast system flow by RFID and bar-code attachment
- ✓ Handles material in various shapes and sizes
- ✓ Decrease delivery time and increase production capacity
- ✓ Eliminate any safety risks
